Professional Summary

AI Backend Engineer (fresher) with hands-on experience building production LLM-integrated systems, REST APIs, and full-stack web applications. Experienced in modular API design, async backend workflows, JSON response pipelines, and AI-assisted development using GitHub Copilot and Claude. Targeting AI Integration Backend, Software Engineering, and Backend Developer roles where GenAI and scalable product systems intersect.

Technical Skills

Backend & APIs	Python (FastAPI, async/await, background tasks), SQL, PostgreSQL, REST API design, JSON response pipelines, modular architecture
AI / LLM	LLM API integration (OpenRouter, Anthropic Claude SDK), Prompt Engineering, AI-assisted code generation, agentic workflow design, GitHub Copilot
Frontend	React, Next.js, TypeScript (familiar)
Databases	Supabase, PostgreSQL, MongoDB (familiar)
Cloud	GCP (3 years — Google Cloud Arcade 2023–2025), AWS, Azure (familiar)
Data & ML	Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit, EDA, Data Visualization
Developer Tools	Git, GitHub, Docker (familiar), GitHub Copilot, VS Code, Linux/Ubuntu
Networking	TCP/IP, OSI Model, Switching, Routing
Soft Skills	Problem Solving, Analytical Thinking, Cross-functional Collaboration, Technical Documentation, Communication

Projects

Pathly — AI Career Roadmap Generation Platform

2026

Python, FastAPI, LLM APIs (OpenRouter), React, Supabase, PostgreSQL

- Built AI-powered roadmap generator using FastAPI async endpoints and OpenRouter LLM integration, converting user learning goals into structured 180-day study plans with milestone tracking and resource curation.
- Designed a modular JSON response pipeline for structured LLM output parsing, achieving sub-2s median response latency; implemented SQLAlchemy ORM with PostgreSQL for persistent user plan and milestone storage.

Acadence — Attendance & Academic Management System

2026

Next.js, Supabase, PostgreSQL

- Built and deployed a production attendance platform used across 22 CSE divisions at PIT, featuring real-time attendance calculations, a skip simulator, and an attendance strategy engine (Easy/Medium/Hard recovery modes).
- Implemented Supabase REST API with phone OTP auth, per-subject attendance state management, and timetable module; resolved critical edge-case bugs including zero-attendance state failures and `Infinity` serialization errors in API responses.

AI Code Review Agent — Scaler OpenEnv Hackathon

2026

Python, PyTorch, HuggingFace Spaces, Meta LLaMA

- Built and deployed an AI-powered code review agent to HuggingFace Spaces ([has1172/code-review-env](https://huggingface.co/spaces/has1172/code-review-env)) for the Meta PyTorch + Scaler hackathon, integrating a LLaMA-based LLM pipeline for automated error detection, code quality analysis, and improvement suggestions.
- Resolved Git remote configuration and submission pipeline issues to deliver the project on time within hackathon constraints.

Education

Integrated B.Tech in Computer Science Engineering

2021 – Present (Expected 2027)

Parul University, Vadodara, Gujarat, India

CGPA: 8.52 / 10.0

Certifications

- | | |
|--|---|
| • AWS Academy Graduate: Cloud Foundations — <i>AWS</i> | • Artificial Intelligence Fundamentals — <i>IBM SkillsBuild</i> |
| • CCNA: Introduction to Networks — <i>Cisco</i> | • Applied Data Science with Python — <i>IBM</i> |
| • CCNA: Switching, Routing & Wireless Essentials — <i>Cisco</i> | • Data Visualization with Python — <i>Cognitive Class</i> |
| • CCNA: Enterprise Networking, Security, and Automation — <i>Cisco</i> | • Foundations: Data, Data, Everywhere — <i>Google</i> |

Achievements & Participation

- Smart India Hackathon Participant (2024, 2025)
- Google Cloud Arcade Program (2023–2025) — Hands-on GCP experience across compute, storage, networking, and ML
- Scaler OpenEnv Hackathon — Built and deployed AI code review agent
