PROFESSIONAL SUMMARY

Software and AI Developer with strong foundations in Python, SQL, and data analytics. Experienced in building full-stack web applications, data pipelines, and AI-integrated systems. Familiar with AWS, Azure, and GCP through coursework and hands-on labs. Targeting AI Engineer roles at early-stage product companies.

SKILLS

Programming: Python, JavaScript, TypeScript, SQL

AI & Data: Data Cleaning, EDA, Data Visualization, Descriptive Statistics, Machine Learning

Libraries & Tools: Pandas, NumPy, Matplotlib, Streamlit, FastAPI, React, Next.js, Supabase

Cloud & Networking: AWS, Azure, GCP, TCP/IP, OSI Model

Developer Tools: Git, GitHub, Docker (familiar)

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork

PROJECTS

Acadence — Attendance & Academic Management System

2025 – Present

Next.js, TypeScript, Supabase, PostgreSQL

- Built a production attendance and academic management platform deployed at Parul Institute of Technology, actively used by students and faculty.
- Implemented a GSD-based algorithm for attendance impact analysis, dynamically computing minimum required attendance to pass each subject.
- Integrated real-time data with Supabase, role-based access control, and a responsive dashboard with subject-wise analytics.
- Resolved critical serialization bugs (Infinity values, epsilon-guard edge cases) and improved system accuracy for edge-case GPA calculations.

Safarnama — Travel Planning Web Application

2025

React, TypeScript, Vite, Supabase, Capacitor

- Designed and developed a cross-platform travel web app with 5+ core features including trip planning, itinerary management, and expense tracking.
- Architected a 6-phase production-readiness plan covering security hardening, performance optimisation, testing, and mobile deployment via Capacitor.
- Managed structured user data with Supabase backend, improving usability and data integrity across all core workflows.

DataMaster Journey — Data Analysis Portfolio

2025

Python, Pandas, NumPy, Matplotlib

- Performed data cleaning, exploratory data analysis (EDA), and data visualization on 8+ real-world datasets using Python.
- Applied structured data querying and statistical analysis to extract actionable insights and produce clear visual summaries.

Plant-Pal — ML Plant Disease Classifier

2023

Python, Streamlit, Machine Learning

- Implemented a Python-based image classification project using 500+ samples to detect plant diseases with preprocessing and result visualization.
- Built an interactive Streamlit dashboard for model inference, data exploration, and result display.

EDUCATION

Integrated B.Tech in Computer Science Engineering

2021 – Present

Parul University, Vadodara, Gujarat, India

CGPA: 8.54 / 10.0

CERTIFICATIONS

AWS Academy Graduate: Cloud Foundations — Amazon Web Services
CCNA: Introduction to Networks — Cisco
CCNA: Switching, Routing, and Wireless Essentials — Cisco
Artificial Intelligence Fundamentals — IBM SkillsBuild
Applied Data Science with Python — IBM
Data Visualization with Python — Cognitive Class
Foundations: Data, Data, Everywhere — Google

ACHIEVEMENTS & PARTICIPATION

- Smart India Hackathon — Participant (2024, 2025)
- Google Cloud Arcade Program — Participant (2023 - 2025)
