Professional Summary

Backend-focused product developer with experience building AI-assisted applications, automation workflows, analytics platforms, and full-stack systems using modern web tools and cloud platforms. Skilled in turning ideas into deployable products using Python, FastAPI, Supabase, SQL, and AI-assisted development workflows. Interested in backend engineering, AI-integrated applications, and scalable product systems.

Skills

Programming: Python, SQL

AI & Data: Data Cleaning, EDA, Data Visualization, Descriptive Statistics, Machine Learning

Libraries & Tools: Pandas, NumPy, Matplotlib, Streamlit, FastAPI, React, Next.js, Supabase

Cloud & Networking: AWS, Azure, GCP, TCP/IP, OSI Model

Developer Tools: Git, GitHub, Docker (familiar)

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork

Projects

Acadence — Attendance & Academic Management System

2025 – Present

Next.js, Supabase, PostgreSQL

- Built a production attendance and academic management platform actively used by students and faculty.
- Implemented a GSD-based algorithm for attendance impact analysis and subject-wise attendance calculations.
- Integrated role-based access control, real-time data syncing, and analytics dashboards.
- Resolved serialization edge cases and improved calculation reliability for attendance and GPA systems.

WhatsApp Store Builder — Multi-Tenant SaaS Platform

2025

React, Supabase, Razorpay, WhatsApp Cloud API

- Built a SaaS platform enabling businesses to manage storefronts directly through WhatsApp.
- Designed a multi-tenant system supporting catalogue management, ordering workflows, and payment integration.
- Integrated Razorpay and WhatsApp Cloud API automation for customer communication and order handling.
- Focused on scalable backend workflows and structured product architecture.

Pathly — AI Learning Roadmap System

2025

Python, FastAPI, LLM APIs, React

- Developed an AI-assisted roadmap generation platform that converts learning goals into structured study plans.
- Implemented JSON-based response pipelines for learning milestones and resource organisation.
- Integrated automated recommendation workflows and external educational resources.
- Focused on modular backend structure and scalable API design.

Safarnama — Travel Planning Web Application

2025

React, Supabase, Capacitor

- Developed a cross-platform travel application with trip planning, itinerary management, and expense tracking.
- Designed a phased production-readiness workflow covering testing, optimisation, and deployment.
- Managed structured backend data systems for improved workflow reliability.

Plant-Pal — ML Plant Disease Classifier

2023

Python, Streamlit, Machine Learning

- Implemented an ML-based image classification system using 500+ plant samples.
- Built an interactive Streamlit dashboard for prediction and result visualization.

- Focused on preprocessing workflows and practical ML inference usability.

Luhn's Algorithm Validator — Card Validation Tool

2025

Python, Streamlit

- Built an interactive validation tool implementing Luhn's Algorithm for card number verification.
- Added step-by-step checksum explanation workflows for educational clarity.
- Focused on algorithm visualization and debugging transparency.

Shivaali — Client E-Commerce Platform

2026

React, Supabase, REST APIs

- Developed a client-focused e-commerce platform with structured product and order workflows.
- Built reusable frontend systems and backend-connected product management flows.
- Focused on maintainable architecture and responsive product usability.

DataMaster Journey — Data Analysis Portfolio

2025

Python, Pandas, NumPy, Matplotlib

- Performed exploratory data analysis and visualization on multiple real-world datasets.
- Applied statistical analysis and structured querying to extract actionable insights.

Education

Integrated B.Tech in Computer Science Engineering

2021 – Present

Parul University, Vadodara, Gujarat, India

CGPA: 8.52 / 10.0

Certifications

- AWS Academy Graduate: Cloud Foundations — Amazon Web Services
- CCNA: Introduction to Networks — Cisco
- CCNA: Switching, Routing, and Wireless Essentials — Cisco
- Artificial Intelligence Fundamentals — IBM SkillsBuild
- Applied Data Science with Python — IBM
- Data Visualization with Python — Cognitive Class
- Foundations: Data, Data, Everywhere — Google

Achievements & Participation

- Smart India Hackathon — Participant (2024, 2025)
- Google Cloud Arcade Program — Participant (2023 – 2025)
